

## Ok Bloomer Plant Shop

### Overview

Ok Bloomer is a small plant business that helps educate people on good sustainability and eco-friendly practices. The Ok Bloomer Website provides information about the business, a means of contact, and an online store where Canadians can purchase flowers while also learning a bit about each one.

### Site Map

### Descriptions for each file

#### index.html description

This is the main page of the website (home page). This visitor is greeted by a welcome message with a scenic background. As the visitor scrolls down, they will see the mission statement of the business as well as a video followed by some images. The bottom of the page has 2 links that go to the plants page and the home page. There is also a button at the bottom right of the page that will scroll back to the top of the page.

plant.html description

This page displays the shop's products and allows customers to add them to cart. Each product on the page has a picture, description, cost, number of items input, and an add to cart button. The page also includes a search function that filters the products by name as well as a scroll to top button. Once a customer adds an item to cart, an alert message will tell them the amount of that item they added along with the total cost of all their items.

The scripting uses session storage to store the customer's input data.

#### contact.html

This page displays a form and a picture. The form gives visitors a way to contact the store directly through the site. The form has a first name, last name, email, phone number, and text area. Once the form has been submitted, the visitor will be directed to the Thank You page.

#### cart.html description

This page displays payment details for the customer. The page will display "Your Cart Is Empty" if no items have been added to the cart. If items have been added, it will display a form for billing details and payment methods. On the side, it will display a table that contains the number of items, plants, and cost. The customer can delete the plant they don't want, and the table will automatically adjust to display the correct information. Once the customer presses confirm, they will be directed to the payment received page.

#### paymentreceived.html & thankyou.html

These 2 pages display a simple header that contains a thank you message. These pages cannot be directly accessed through the website's navigation.

#### stylesheet.css

This stylesheet contains the CSS to style the main page as well as the headers, footers and background of all pages.

#### cartstyle.css

This stylesheet contains the CSS to style cart.html.

form.css

This stylesheet contains the CSS to style contact.html.

searchstyle.css

This stylesheet contains the CSS to style plants.html.

cartFunction.js

This script contains functions used in cart.html. It contains scripts to display and hide the content, calculate & insert rows into the table, remove rows from the table, and submit the form. More details are commented in the file.

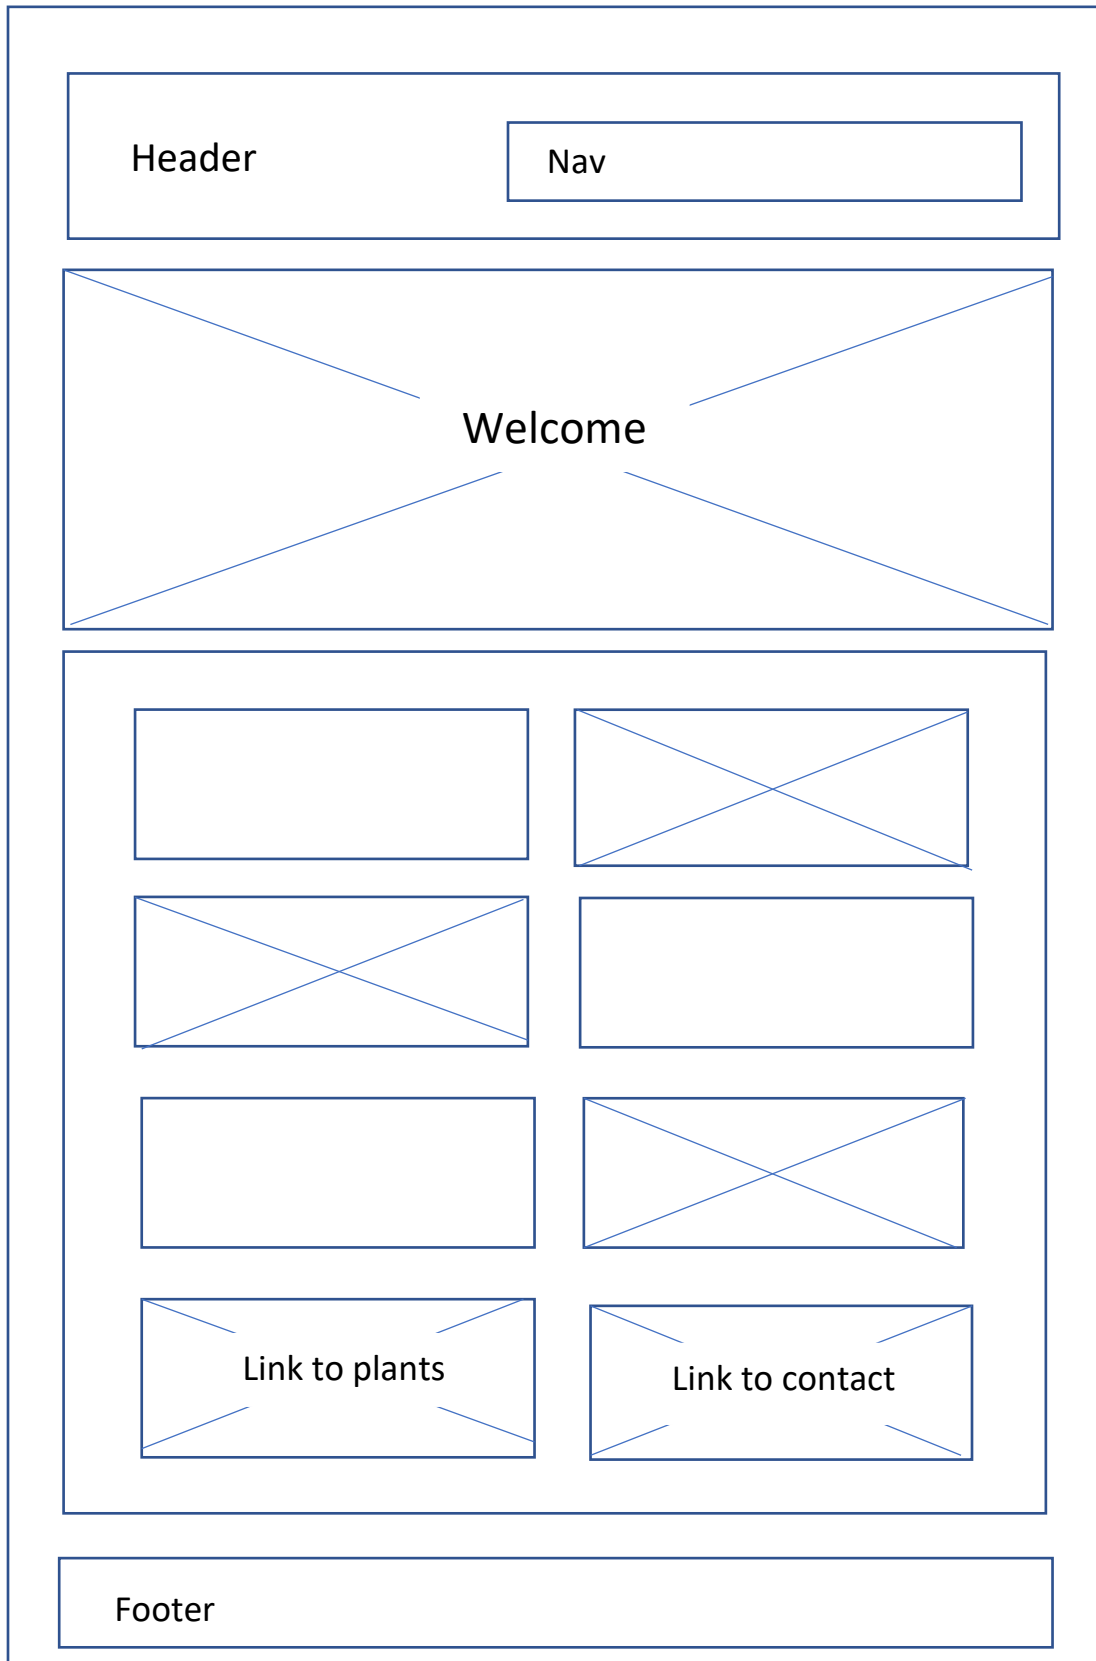

scrollFunction.js

This script contains functions used in index.html and plants.html. This script is used to give functionality to the scroll to top button. It will also hide the button until the customer scrolls past a certain point. More details are commented in the file.

searchFunction.js

This script contains functions used in plants.html. This script contains functions used to search for items, add items to the cart, calculate the total cost, and alert the customer when an item has been added. More details are commented in the file.
